

For a Total Solution to all of your Materials Testing Needs

FOR IMMEDIATE RELEASE

ADMET introduces full line of grips and fixtures for mechanical/materials testing

Launches online catalog, introduces CD, to highlight products/facilitate ordering...

NORWOOD, Mass. – Dec. 6, 2005 – ADMET Inc., a provider of integrated materials testing systems, today extended its business by offering a full line of grips and fixtures for materials and product testing. The products presented in the catalog are offered with a variety of adapters so that they can be used with ADMET testing machines as well as with machines from other manufacturers.

The catalog, located online at <http://www.admet.com/grips.htm> and on CD by request, features 80 of the almost 300 fixtures and grips offered by ADMET. It includes compression platens, 3 and 4 point bend fixtures, manual vice and wedge grips, self-tightening and hydraulic grips, as well as specialty grips and fixtures. As a supplement to the off-the-shelf accessories, ADMET engineers will work with customers to design and develop custom fixtures to meet their needs.

“The catalog represents an excellent cross section of our full range of fixtures and grips,” commented Richard Gedney, ADMET founder and president. “We’re making it easy for our customers to select accessories when they buy new or used equipment from us or when they retrofit their existing equipment. When coupled with our custom design service, ADMET can meet virtually any materials or product testing situation.”

Customers should contact ADMET at 800-667-3220, sales@admet.com or visit <http://www.admet.com> for further information, to order products or to discuss special needs with an ADMET engineer.

About ADMET

ADMET Inc. combines high quality products and services with total cost effectiveness to deliver the industry’s most efficient materials testing systems. Its products include materials testing frames, software, specialized control units, and grips and fixtures. The company offers new testing systems as well as
